SKILLS

- Soft: Teamwork, problem solving, customer service.
- Technical: C++, Python, Unity C#, OOP, MySQL, Blender, Excel.

LANGUAGES

- Spanish - Native
- English - Proficient

EXPERIENCE

Discord Freelancer - Greg Sheffield **Remote**

Game Developer (December 2025 - Present)

- Developed core gameplay systems for a 2D rhythm-based game in Unity.
- Implemented robust synchronization architecture to ensure precise timing and audio-visual alignment.
- Designed and optimized timing systems to maintain performance stability across different hardware configurations.
- Collaborated in the technical implementation of rhythm mechanics and beat detection algorithms.

Discord Freelancer - EwokAway **Remote**

Game Developer (January 2026 - Present)

- Developed gameplay systems for a hybrid game combining platformer, turn-based combat, and RPG mechanics in Unity.
- Implemented core combat systems integrating turn-based strategy with real-time platforming elements.
- Designed modular architecture to support multiple gameplay modes and seamless transitions between mechanics.
- Collaborated on balancing gameplay systems and creating a cohesive player experience across different game genres.

Discord Freelancer - Koza5104 **Remote**

Game Developer (September 2025)

- Developed gameplay improvements for ATF Simulator, a Unity-based game project.
- Enhanced camera movement system with new functionalities for better user experience.
- Implemented procedural walking animation system to improve character locomotion.
- Collaborated remotely with client through Discord for project coordination and feedback.

Gabagoolie Studios **Remote**

Lead Developer (April 2025 - Present)

- Led the technical development of a multiplayer shooter in Unity, including gameplay systems, modular architecture, dynamic UI, and real-time networking logic.
- Coordinated tasks, defined roadmaps, and created internal tools.
- Applied systemic design and technical leadership in demanding and collaborative environments.

Pansimula **Remote**

Software Tester (August 2024 - October 2024)

- Tested software in various network and hardware environments.
- Generated detailed bug reports for developers.

Ratmunch Studios **Remote**

3D Generalist (March 2024 - December 2024)

- Freelance work as a modeler, animator, rigger, and texture artist for video games.

New Path **Santa Fe**

English Teacher (October 2023 - December 2023)

- Private remote lessons for students of different ages.

Coya Software **Santa Fe**

Technical Support Assistant (February 2023 - April 2023)

- Provided customer service and troubleshooting for SQL-based systems.

PROJECTS

Bridging Resources **Game Jam**

Developer (August 2025 - September 2025)

- Two-week game jam project completed and published on Itch.io.
- Focused on resource management mechanics with an RTS-style approach.
- Designed gameplay systems and collaborated on art and UI implementation.

EDUCATION

Higher Technician in Software Development **Santa Fe**

- Developed applications in C++ and SQL.
- Applied agile methodologies in software projects.
- Created database-driven and web-based software solutions.
- Participated in academic projects, including games and interactive apps.

CERTIFICATES & LICENSES

Codo a Codo **Buenos Aires**

Big Data and Full Stack Python Course (December 2022)

- Full stack development with Python and frameworks like Flask/Django.
- SQL and NoSQL database management.
- Used data analysis tools like Google Data Studio and Sheets.
- Applied Big Data concepts in practical projects.
